

Math

Use the pages from the Envisions Math Book. When they are finished, please check their work, then take a picture of it and send it electronically to your child's teacher.

Required:

Topic 11 Test on pages 683-684 (These are what we use as practice tests at school). There is no video to go with this.

Please do numbers 1-5 and number 7. Whenever a question says to choose all that apply, there are at least two answers.

For this assignment:

- On number 3 - they need to stack and solve all 4 equations before answering yes or no. This can be done on a separate piece of paper if needed.
- On number 4 - stack and solve (show your work).
- On number 5 - try the number line - do not add up to subtract. Just subtract.
 - Also stack up the equation and solve it.
- Skip number 6.
- On number 7, solve the equation in the first box. Draw the place value blocks and solve in the second box.
 - This is the same type of problem we did on Tuesday.

Optional:

- Prodigy (website or app)
- KHAN Academy (website or app)
- Play a game with a deck of cards (Do not use 10, Jack, Queen, King, or Joker. Ace's count as 1.). Draw 3 cards and make a 3 digit number. Draw 3 more cards and make another 3-digit number. Put the largest 3-digit number on top and solve the equation.
 - If two people are playing, each person will have their own equation and the person who has the greater difference will get to keep all of the cards.
