## 1. Circle Song and Sphere Song

<https://youtu.be/YRWbpsREIVU>

<https://youtu.be/Si3CNSGEI08>

2. Have your student find a circle and a sphere around your house.
3. Have your child get a ball and talk about it's shape.
4. Have your child bounce the ball 3 times.
5. Now let your student bounce the ball as many times as they can while you help them count how many they can get.

\*\*\*If you want more practice you could take turns bouncing the ball and counting to see who can get a higher number. Make sure you keep using the word sphere so your student hears the word more than once.
