

COLLAGRAPH PRINT

A collagraph is print that is created from a collaged surface.

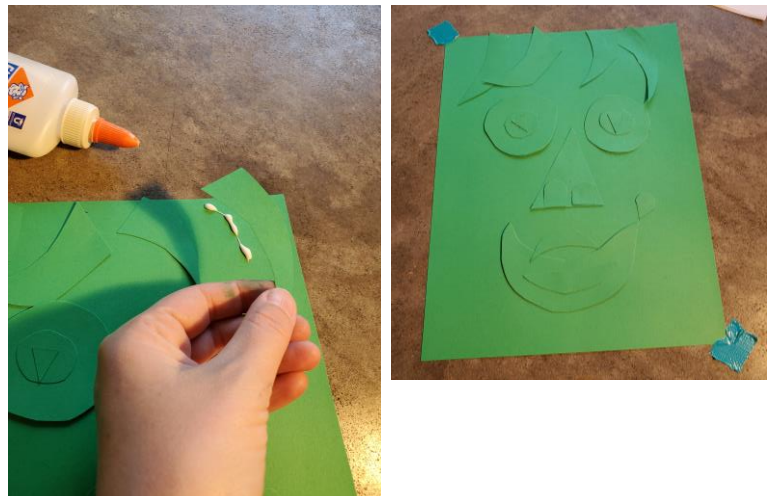

Step ONE: take two of your cardstock/thick papers and begin cutting shapes out of one of them.

Step TWO: arrange your shapes on the other paper to create an image. You could create a face like I did or make whatever you want!

Step THREE: Glue your pieces down to the paper with Elmer's or a hot glue gun (parent supervised), then tape your paper down to your table.

Step FOUR: take your oil pastels or crayons and make them **NAKED!** AH!

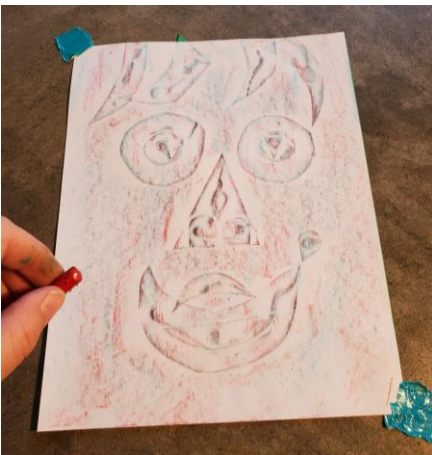

Step FIVE: tape the computer (thinner) paper on top of the image you created by cutting paper.

and begin to run in up and down the paper.

Step SIX: take a naked crayon or pastel, place it on its side

Step SEVEN: continue this until you start to see the image you created! You can also add more colors as you go to make it **POP!**

Step EIGHT: remove your new collagraph print and try it again, or make another collage to print!
